—The circumstantial evidences on secret attack against Japan by

## EARTH QUAKE WEAPON by USA—

Letter to UN Security Council Sanctions Committees

Dear staffes of UN SCSC.

Now author(physicist) must report and protest hidden illegal attack on Japan by EARTH QUAKE WEAPN(=EQW) by USA. It's a secret means for threaten and tortue for Japanese to **suppress Japanese political movements unfavourable for USA**. As this too serious problem, however, author could not reveal manifest validity, but some circumstantial evidences(physical principle and historical records) as follows.

Now author strongly peti UN SCSC to secure our security in reasonable ways discussed and agreed by concerned nations.

### ①Physical principle:

#### ①eathquake the mechanism:

Outrageous huge **bursting of eathquake energy itself** never could be made by any amount of atomic bombs, then function of earthquake weapon is **a triggering on unstable earthquake sorce S** which potentially has and generate outrageous huge amount of earthquake energy. Essentially it is due to **geodynamical distortion energy** reserved and growned between **colliding two flowing continental lands** on **global surface**. Continental land flowing is originally due to hydrodyanamical-heat of **geo-core energy(CE)** generated by giantic nuclear fusion one in the geo-core.

②EQW is charge density wave radiated by mono-pole antenna:

(1)Smashing kidney stone by focusing ultrasonic waves from many direction.

Sound wave is a **mass density one** of air moleculars. Then many wave could be increased their synthetised amplitude by focusing their direction with synchronizing their wave phase. In this way, they could get sufficient power to smash target of kidney stone. It's a medical apparatus known well.

(2)Smashing stones of earthquake source by focusing LEW from many directions.

(a)charge density wave(=LEW):

Our dairy using electromagnetic wave in such portable phone is **transversal** one radiated by high frequency **alternate current** in dipole antennna. However in electromagnetic theory, there is another mode of **longitudinal electrical wave**(LEW) (without magnetic one) radiated by electrical charge in monopole antennna. A LEW is wellknown as electro-static force between two  $\pm$  charges of opposite sign. See items of ① ② ③ in [1]:Overview on "B Wave Generator  $\equiv$  BWG" Creating Electrical Energy from Nothing:<http://www.geocities.jp/sqkh5981g/BWG.pdf>

(b)Singular feature of LEW radiated

by mono-pole charge antenna without input power(yes, without input power!!).

(c)Singular feature of LEW penetrating in propagation medium without attenuation.

LEW(also called B wave) propagation is a consequence of the charge conservation law, for which none propagation medum could violate. That is, nothing attenuation of its propagation. However they could be caught to way of bypassing to ground potential(earthing)

(c)Similar to way of (2), LEW could smash stones of earthquake source by focusing those from many directions.

Authorhimself has not seen the actuality of EQW, so above is a possibility.

However he observed the reality of marvelous B wave features both in theoretical and experimental, which was disclosed in my website(Yes, author is the expert).

### ③The historical too curious coincidence of dates in the suspicion :

#### ①earthquake weapon(EQW)!!.

Maybe you have known that Japan after the war is not an independent nation, but belongs to USA in political, economical, and ideological. Hereupon, recent movement momentum of **Japan Democratic Party** is expected to win political power in next election. It's a kind of revolution which knock down dictatorship regime of LDP of elite class of Japanese puppet invisibly connecting with power of USA since the end of the war. Yes, Japan has been a dictatorship nation, and it's a shame of us Japanese the slave. As for this matter, author of this report entirely petition against employing invisible threatening power of CIA and the artificial earthquake weapon. Yes, certainly **earthquake weapon(EQW)!!**. Collision of two or more ultrasonic waves focused on a target material point (with extremely high density of wave) can destroy it. EQW is charge density waves focused on a piezo-electrical rocks far beneath ground surface, which cause triggering unstable earthquake source. In following items, you could see incredible coincident of dates.

(a) Hanshin-Akashi big air attack by US Air force in the world war 2nd was in **19/January/1945**.

(b) San Fernando earth quake of M6.6 in California was in **early morning of 17/January/1994**.

(c) Hanshin-Akashi the big earthquake of M7.2 in Japan was in **early morning of 17/January/1995**. To be very rarely at that time, Japan Government was not LDP, but short term one of prime minister Murayama Japan socialist party representative .

(d) In July in 1995, author disclosed above facts and was attacked with electric shock-gun by terrorists, who has not been arrested by political police.

#### ②Conspiracy and terror against the democratic movements in Japan.

Since then, not only author but also many others had begun to argue on employing attack with EQW by US military force. The anger and suffer of many victims never be disappeared without justice. To tell from the very beginning, hidden political conspiracy and terror (by CIA and their agents) on the democratic movements (whose agenda is free and equal partnership between USA, but not that of slavery relation) has been always going on since the end of the war. They had well known that the military bases in Japan are also secret espionage bases.

For example, Yokosuka city (author's residence city with US navy base) may be a

best place to observe their organized activities. Their secret espionage activities fashioned conservative ideology has been invading most of organizations (corporate and area administration), areas, and individual. Not only conservative ideology groups, but also religious and leftism ones are more worse. It's an upside down strategy deceiving amateur people. Especially the activities in areas of public administration are worse for citizens. Simply and summary to tell, "nation and people are those who are exploited by (invisible) **nobility autocrats\***" (the highest status in hereditary nobility and corporate family with bureaucrats (including police and military, education, mass media). Upside down aspects are peculiar feature in espionage for **mass deceiving in large scale.**

**\*)** A. Sutton & K. Millegan, fleshing out skull & bonds, Triendy LLC 2002 in USA.

Consequently, following are those very ugly results.

(1) Children are divided into major slave and minor elite in education.

Both of them are spoiled not to think and create by stimulating own ability, but to imitate and obey by memorizing **established knowledges.**

Elite is selected to be agent who could adapt own to the established regime.

Corruption in judicial and medical are worse, which is rather similar to USA.

(2) Young adults are in such environments **not to survive over pension age.**

Air, water and junk foods pollution without green zone (which has been destroyed by surfacing with cement and asphalt), hard tension in working environments with less social-welfare, excess using drug in medical, hard tension in dairy information environments causing uneasy and unconscious untrust feeling on the others by mass communications on crimes, accidents, disasters, and many scandals (some of those are conspired). Above all, ego-centrism consumer is recommended.

(3) **Hidden inspection and framing up crime and scandal against (politically and ideologically) target persons.**

Above mentioned are realities of tortured Japan. Those extremely malicious could be made not by accident, amateur, but by the professional skill highly studied and educated in the special organization. It's also upside down world.

See website. <http://upsidedownworld.org/main/>

③The deep sins of Japanese before end of world war the 2nd.

Although too malicious aspects of CIA conspiracy on Japan after the war,

I think that there might be their own standard of excuse and accuse to do malicious against Japanese. Yes Japanese before end of the world war the 2nd had done many big sins in the invasions for neighbours of Asian people.

- (1)The illegal long invasion and depriving nation independent and human right of Korean people, which has been serious deep hate feeling on Japanese since then.
- (2)The illegal invasion and depriving nation independent and human right of Chinese people.
- (3)The illegal invasion and depriving independent right of south Asian nations people and USSR(Russia Kingdom).
- (4)Anti-humanity acts by medical experiments on alive war prisoners by the infamous 731 corps in world war the 2nd in China. However it's USA who libetated them after the war by the secret dealing.

Certainly we Japanese still could not become nation people who are respected by neighbours. Now most of the people had become spoiled to be more selfish by so called economic growing since 1960. So we might need a certain severe judgment to stimulate to conscious for own sins. However to say so, some of them aware of those facts and try to take action against such momentum. Nevertheless, CIA hate more against such peoples. Therefore the essential problem may be summarized as

Which do you opt to live with together(peace), or live without together(war) ?.
