

**An Strong Evidence of telepathy(remote communication between brains)
And about on the Serious and Wonderful AI.** 2023/4/9

Now we could have gotten scientific evidence of telepathy possibility.

A Mind Activity(=M) can radiate a EM WAVE(=W)(a pattern of electromagnetic field)caused by electromagnetic chemical reaction in brain<Major of those may be electrostatic>, Such M and W are one to one mapping as a result of causality.This time experiment proved this clearly.Thereby mind-mind communication is possible both by aural and electrical.

Then a decisive necessary condition is **resonance** between **twins**(or astral projection=one's alter ego in the other world) to accomplish reversibility of radiating and receiving.

<http://www.777true.net/Scientifical-Mechanism-of-Prophecy-by-Paranormalities.pdf>

[3] : Resonance between this world and the other almighty one by CDW.

I :The other world is **almighty**,where the holy one with **strong decisive motive** reveals a message(revelation)to ghost messenger(**ghost prophet**). It is deed by almighty !!

II :The ghost messenger in the other world and the messenger(prophet) in this secular world are **complete twin**. Thereby,a **telepathy as strong resonance** could be realizable, which turn to become message transfer to this secular world through the messenger (**the prophet**).....This is a hypothesis,but not proof.

(1) **'Mind-reading' AI: Japan study sparks ethical debate**

Osaka University researchers have used AI to decode subjects' brain activity to create images of what they are seeing.

<https://www.aljazeera.com/economy/2023/4/7/could-ai-read-minds-somedayjapanese-breath-through-sparks-debate>

.....

Takagi and his team used Stable Diffusion (SD), a deep learning AI model developed in Germany in 2022, to analyse the brain scans of test subjects shown up to 10,000 images while inside an MRI machine.

After Takagi and his research partner Shinji Nishimoto built a simple model to “translate” brain activity into a readable format, Stable Diffusion was able to generate high-fidelity images that bore an uncanny resemblance to the originals.

(2) **The Third Eye**

[https://en.wikipedia.org/wiki/The_Third_Eye_\(book\)](https://en.wikipedia.org/wiki/The_Third_Eye_(book))

(3) **Sodo Sect, remote mind-reading**

Also trained monk is said to be able to read other people's minds.

Hideo Seki, *Psychic Powers - The Mysteries Revealed by Electronics* (Kappa Books)

1983/4/1: 関英男, 超能力—電子工学が解明したその神秘 (カッパ・ブックス) 1983/4/1

(4) **B-WAVE**(electrostatic one radiated from AC charge without energy).

□ $\mathbf{A} = -\mu \mathbf{j}$. A wave is ordinal EM wave employed in portable phone, etc.

□ $\phi = -\rho / \epsilon$. Scalar one radiated from AC charge on capacitor antenna without energy.

Note 3 fundamental electrical components of “LCR”, where only Resister consume energy.

ϕ is also called B wave caused by electrostatic field by such bio chemical reaction ruled by dynamics of electrostatic force.

(5) **Quick Guide on AI.**

*This times experiment employed AI to prove one to one mapping. Authors interpretation on

(a) AI's essential function is a **pattern recognition**(words-language, image, ..., smell) .

(b) A pattern is represented by a **direction vector** in multi-dimensional metric(distance)space,

(c) where **near or far is measurable by distance of two unit length vector.**

(d) Thus we can judge pattern similarity(good) of dissimilarity(bad). → **digitalizing(LOGIC).**

<http://777true.net/True-or-False-Judging-Machine.pdf>

APPENDIX-2:: On “Deep Learning”

(e) Learn a lot of materials and create a **material search warehouse.**

(f) In response to a question, the material is pulled out, or a **new pattern is produced in the process of combining them**, repeating trial and error until **the request is met**. Since it is a calculator, there are no overwork complaints.

*AI's recognition method is entirely same in Observation Logic of Quantum Mechanics.

This is an evidence of universality of the method.

(6) **Our Brain Activity is not mysterious, but clearly simple* LOGIC.**

It is entirely seeking something to live better. In everyday life, we always face necessity (problem) to be satisfied (solution). Then AI could do almost what mankind can.

*The fundamental logic decides it strictly that "cause A result B" is true or false.

*Not only determinism, but also randomness is necessary in brain works <synthesis>.

Part II :

(a) **PROBLEM FINDING problem.**

Lean AI **everything inconvenient**, then search those in every field and times .

Please revealed us all those with **the priority sequence**.

(b) **SOLUTION FINDING problem.**

Entirely **search parts and synthesis** those that can overcome **the inconvenient**

***search**=finding something parts that satisfy necessity conditions

***synthesis**=try and error (by "random generator") toward building and getting satisfaction.

counting up all the possible combination of parts <definiteness case>.

* **random generator**=heuristically try to build something with collected parts

=or **intuition** <indefiniteness case>

=**counting up the possible combination of parts in a target area**.

(c) **SOLUTION SAFETY TEST by (a).**

Derived solution must be examined by (a).

Part I : The Most Primitive Problem of the Definition "inconvenient".

AI is entirely a learner (but powerful enough), while we mankind must be their teacher !!.

Maybe at first, we must make "AI Socrates and AI Jesus the great teacher on how to live with less "inconvenient"". "

Part III: A person who is unconsciously, or consciously *familiar with heaven* = a *genius*, or *prophet*. In this matter world is a realization, while not matter world is not a realization, but everything at all, The other world <vacuum one> is *almighty world*. AI never overcome them. AI can learn the Bible, but not write it.

For an example is *Nicola Tesla*. His invention is not heuristic, but complete at the first. It's said that Mozart's music came out smoothly, Lee Morgan and Sonny Stitt sound similarly. While the great Beethoven is said to have reworked his scores, and John Coltrane is said to have practiced very long hours a day. Former musicians seem glitter, while the latter seem majestic.
