

## July 4th 2020 AMAZING Planetary Alignment EARTHQUAKE Indicator !

Earthquake is thermal mantle fluid flow colliding in ultra high pressure, and could be affected by planetary gravity **relaxing the under ground pressure toward triggering plate sliding.**

*Planetary alignment in the solar system includes Earth and planet around the sun. It is a phenomenon that is lined up in a row, and is believed to have a great impact on the earth such as **huge earthquakes**.*

\*Underground pressure decreasing is to trigger **plates sliding**, Venus, **Jupiter, Saturn** serialization is equivalent to outward gravity by **about 14 moons!** <Japanese→English>

6/24 day has been already in danger time !! <360 degrees/365 days>. Before huge earthquake, electron density(TEC) in ion sphere at the region is to turn blue to red. <2020/06/24,25>.

This is **short term earthquake anticipation** by Chemical Electron Physics in seismic reactions. In ordinal time, epicenter release massive electron toward earth surface, while relaxing epicenter pressure is to pull back the massive electrons once released. This massive electron shift is to reflect TEC response in ion sphere,,,,etc

This is **earthquake engineering** by Irradiating Charge Density Wave(CDW) which can **destroy chemical bonding at epicenter rocks** toward triggering plate sliding. CDW can be re-radiated from modulated electron density at Ion-sphere by inputting modulating ordinal electro-magnetic **beam wave** from ground sites(**HAARP base**).

□  $\mathbf{A} = -\mu \mathbf{j}$ . This is ordinal electro-magnetic wave equation stimulated by current  $\mathbf{j}$ .

□  $\phi = -\rho / \epsilon$ . This is CDW(scalar potential)wave equation stimulated by charge  $\rho$ .

Both are also called Maxwell Equation in **standard** electro-magnetic **theory**.
