Life-Assurance by National Strategy in coming climate WAR-TIME. '13/11/27,12/22 <W Default in finance & climate debt toward building new money regime>> summary_1:

To tell climate fact, prolonging the current regime would cause coming hell decades of famine and unprecedented outrageous various chaos toward mass extinction about in 2040. Climate scientists had known well, however they could not having global declaration the deadly fact to start the global countermeasure against the deadly crisis..

A decisive reason of the difficulty may be due to nothing synthesizing on renewal politico-economy regime against climate crisis. Because, the new regime is to require

(1)More than 80% CO2 cut to emergently stabilize global temperature rise. Even though, maximum temperature rise would be 0.3+0.1°C?, which could not be told safe enough.

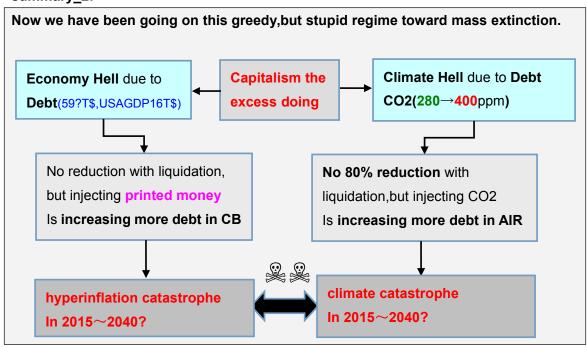

(2)Emergent Arctic Cooling geo-Engineering to stop ice lid retreat for intercepting Methane Eruption Catastrophe(the final mass extinction event) by Arctic ocean warming.

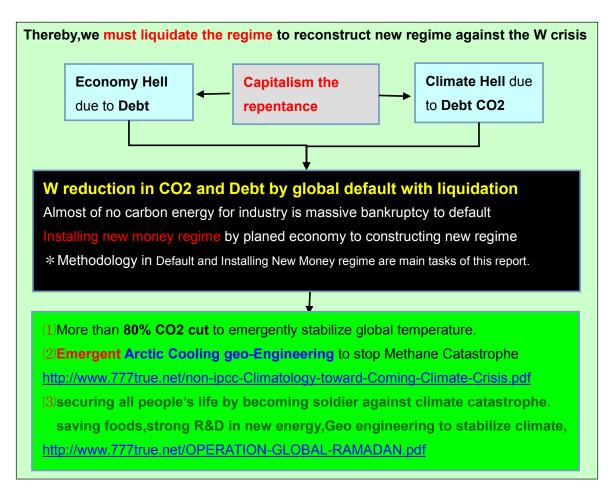

(3)In above conditions, securing all people's life. If not all, but minor elites, which would cause criminal or wars chaos toward escalating global struggling chaos(op EndGame).

Then the **politico-economy new regime accomplishing** (1)(2)(3) seems very difficult to install. None(??) declared such revolutional proposing at least in global public. Certainly ,it is nothing ,but **revolution** also against the status quo the stubborn conservative worrying own status decline. Once those who knew nothing about new regime design, but knew (1)(2)(3) would become desperate !!!. This may be one of the most reason why the major scientists (also public) had become silent. Note those may be major, but few has been tackling against the silent. Even though, nothing strong proposing new regime design would cause something desperate. Now we could overcome the difficulty. This is the aim of this *trial report*.

Also note that the world has been facing unprecedented **global economy collapse** due to huge debts(CO2 in air is also debt must be reduced). Then they has been on **quantitive easing** to bailout government and corporate in difficulty by huge printed money supplying in order to transfer debt from private to public. After all, the massive debts could not be settled without causing **hyperinflation** at last in their plot. This would be **double disaster of both economy and climate in coming years**. The righteous settlement is decisive **default with liquidation**. Then note installing operation(1) is also necessary default. Since industry **without enough oil** shall be closure to bankrupt. Government becomes no revenue, but default with reasonable liquidation and with **issuing new money**. This method could be explained **consistent** in this report. Note the conservatism without the countermeasure becomes desperate hell, **revolution** would be also **hell, but with hope for future**.

summary_2:

summary_3:The Plan for Resetting to new Regime(ready time for 2,3 years) (1)The Purpose.

- (a)deadly climate fact confirmed by government due to the same declaration by scientists.

 Notification on Strict Carbon Energy Rationing by the 80% reduction policy and on Emergency of Arctic Cooling geo Engineering<climate change crisis = CCC>.
- (b) Government Default Declaration toward new money issuing with reasonable liquidation.
- (c)Foretelling Industry Bankruptcy and Massive Jobless by ban on carbon energy.
- (2)The Implementation.
- (d)Notification the tentative Plan toward new regime with energy rationing, with new money and with massive employment<Operation Global Ramadan>.
- (e)Notification on researcher employment on the final Planed Economy.
- (f)Starting spontaneous industry liquidation toward resetting and registering new employment(soldier)due to the tentative plan"(1)(c)" notified by government.

Old Conitation Dogina revolution	
Old Capitalism Regime	New pseudo Wartime Regime
government death with massive debt	government alive by new money issuing
plutocracy by wealthy ruling	without hyperinflation and inequality.
massive lie ruling as phyco-operation	democracy ruling
violence by the powers(atheism)	
not countermeasure against CCC toward	full countermeasure against CCC to
mass extinction(operation EndGame)	co-live(operation Global Ramadan)
massive employment (??)in industry	massive employment in public with private
	self-sufficient economy system building
	strong R&D in new energy, geo-engineering
	on Arctic cooling,and global forestization
free capitalism the competitive	national (global)project the cooperative
pseudo economics the chaos to decay	economics(END) for planed economy
extravagant life with massive C-energy,	minimum life assurance for all people
with decadence(divide and rule).	with cooperative sprit.
Industry with massive Carbon energy	agriculture with minimum carbon energy
transportation with massive C-energy	transportation with minimum C-energy
carbon energy narcotism toward mass	carbonless new energy to co-live
extinction	solar-wind power,water fuel(B wave),

These may be massive race emigration to agri-area and to (geo)engineering military.

[1]: Defeat of the Capitalism<Crucial Climate & Economy Facts Recognition>.

:As for details of **economics**,readers are recommend to learn **END** at first. http://www.777true.net/Quick-Guide-to-Economy-Network-Dynamics.pdf.

None could stopt to recognize war defeating reality in the global capitalism ruling by having known following deadly realities.

(1)The deadly Climate situation.

If you try to find websites on 80%CO2 reduction, many of they parallelly say until 2050 !!!.

By authors collected data, about 2050 is era of extinction event(Arctic Methane Catastrophe) without having done effective climate countermeasure !!!. Certainly they could not emit CO2 anymore by that 2050. Now the world affair has been such as mentioned in above bad joke.

Emergent installing necessity of the operation (1)(2)(3) could be confirmed in following.

http://www.777true.net/non-ipcc-Climatology-toward-Coming-Climate-Crisis.pdf

http://www.777true.net/OPERATION-GLOBAL-RAMADAN.pdf

So the capitalism with massive oil consumption had entirely **destructed climate stability** toward mass extinction. Now we have been on brink of abyss. This is nothing but deadly defeat of the capitalism. Now in this report, climate analysis-itself is not main task.

(2) The deadly People's Life situation and the Global Elites.

(a) Main theme in this report is **economy synthesizing in the deadly climate fact**, but not climate analyzing-itself. At first note what have happened by the unprecedented global economy recession since 2008. Note American population is about 3.2 trillion.

population of food stamp in recent USA

http://money.cnn.com/2013/09/19/news/economy/food-stamp-cuts/

Some 47.6 million people, or nearly 15% of the population, get food stamps, according to September federal data.

https://www.commondreams.org/headline/2013/09/20-1

A shocking 14.5 percent of all U.S. households—amounting to **49 million people**—suffered food insecurity in 2012, with poor households

More than six in ten workers say they worry they will lose their jobs

http://www.washingtonpost.com/page/2010-2019/WashingtonPost/2013/09/28/National-Politics/Polling/release 266.xml

16.4 % of the European population is poor.

http://inequalitywatch.eu/spip.php?article99&lang=en

EU economic crisis causing massive rise in poverty – Red Cross.October 10, 2013 http://rt.com/news/europe-crisis-red-cross-981/

(b)"1% rich monopolize 46% global wealth !!".

- * http://www.legrandsoir.info/les-super-riches-de-1-a-0-7.html
- * http://tempsreel.nouvelobs.com/topnews/20131009.REU4085/1-de-la-population-detient-46-de-la-richesse-mondiale.html

Now governments has been repaying debt by borrowing debt. Something catastrophe in coming years may be possible in ordinal common sense. As the consequence, nation money become terrible tight, while necessary payment has been entirely increasing.

It's upside down to weaken public, only which can support private when private had become weak in the historical global recession. However, big money without becoming tax has been decisively lying in some wealthy in private sector.

Also note massive nation people now has become **burden** for **the global noble elites** in both meaning of economy and climate crisis. Then they has been conspiring outrageous plan called **Operation EndGame**. It's extermination of humanity. http://www.imdb.com/title/tt1135489/plotsummary?ref =tt ov pl

They has been fearing facts exposed to public and the revolution to cause their decline.

(c) What has been interfering the policy accomplishment?

This most substantial problem is described in (d).

Summary to tell, its the supremacism of wealthier people who consider poor should be exploited and perished at last(operation End Game).

http://www.imdb.com/title/tt1135489/plotsummary?ref =tt ov pl

For the New World Order, a world government is just the beginning. Once in place they can engage their plan to exterminate 80% of the world's population, while enabling the "elites" to live forever with the aid of advanced technology. For the first time, crusading filmmaker ALEX JONES reveals their secret plan for humanity's extermination: **Operation ENDGAME**.

(d) The Crucial Ideological Factors in Economy (and Politics) at now.

Strong want on higher income and higher status with confident on own ability may be fundamental motive to be entrepreneur. However such motive could be possible by some inflexibility also in bureaucratic system.

A wealthier people is to be entirely worry on **losing own advantageous status-quo**. It is this mind that had established the communism regime in **Russia Revolution** 1917, which is entirely upside down,but fact making common enemy of capitalism ally of WEST with **massive brain washing of anti-communism** against people and elites in WEST.

http://hidhist.wordpress.com/books/none-dare-call-it-conspiracy-chapter-4/

Andropov the KGB chief having known the fact was to turn Soviet regime in 1989. A reason is told that USSR could not endure **huge military budget for the cold war**. After the event,the world monopolized by USA had been entirely endeavoring **economic growth**,while it had turned to destruct **climate environment** which now becomes fatal. By anyhow.they has been in **strong delusion** that now era has been forever<see (4)>. This **stubborn mind in the elites** has been causing the world non flexible to turn and evade terrible hunger and poor in economy crisis and in coming deadly climate crisis. To tell from the very beginning,they will not allow to admit the being of problem,but

has been hiding and interfering **the honest debating** those by threatenings.

Also massive people has been fearing in frank debating due to fear on loosing their status in the conservative and brutal capitalism regime. That is, no liberty on **honest debating**. One of strong motive of this report is **to assure not to lose people's freedom(job)**. This is **the top problem** to be solved **emergently**, or we would face outrageous hell and our extinction before long. Above all, the time is not so much !!!..

(e)What has been intercepting the policy accomplishment ?=upside down America! (the conservative eugenic ideology=those who are weak should be perished!!!). "People and nation are those who should be exploited by nobility hereditary". "Perpetual struggling strategy by setting up enemy due to the supremacism"

This is ideology of skull and bones the elite secret society in USA, which is told due to Hegel Ideology in feudalism Preussen Germany in 19th. Then note the brutal and insidious ruling machines CIA-military industry complex in USA are ruled by the minor American elites, which are told reincarnation of NAZIS. Then note such CIA-military (the eugenics ideology machine with anti-communism and with violence) are food stamper by nation tax. police & bureucrats are also the same. It is substantially not poor, but the evils who has been the biggest parasites in deposit-box of nation money.

http://www.777true.net/The-Upside-Down-World.pdf

(f)Government's bailout and following Quantitive Easing are all social welfare. Since 2008,USA government gave bailout to corporates GM,etc too big to fail. QE1-2-3 has injected more than \$2.5T in GDP(2012)=\$5.5T to buy bad asset in financial sector. http://www.policymic.com/articles/64699/fed-press-conference-why-qe3-will-never-end Now those foods stamp for American capitalism is told impossible to stop. Even such haughty them,unless big government,they could not survive by anymore.

(g)**Social income assurance** would make people wish not to work harder.

This may be true, however this would be very natural not to cause excess doing causing such climate collapse in the Capitalism Regime(the global abrupt economic growth by fueling huge amount of carbon energy has been causing deadly climate collapse).

An animal with no hungry is to sleep by no working.

Crows are told to play by various tools, which could be observed frequently

(h)However to tell so,now world has been facing **outrageous tasks** to evade climate collapse such as **Arctic Methane Catastrophe**,which has been urging abrupt **synthesis-ing the global project** by global ability ,global wealth and global brave manpower. Then the project urges joining both character persons of (d) and (g).

(i)Still even now,why is it "democracy" for people ?!!!.

It is a leader(with sub) who could determine their organization destiny.

Then which do you opt leader ?? from **hereditary bloodline**,or from none bloodline,but **ability-line** approved by mass-organization-itself. The latter is called **democracy** with massive **people** foundation..A best leader must be selected only by his ability which has been certificated in his past outcomes in organization,but not by bloodline. Massive people is maximum possible source for growing good leader.

As you had known well,bloodline leaders are too conservative to adopt new regime for evading global catastrophe. It is them who has been causing this world toward catastrophe. Note Edward Snowden and Bradley Manning are justly not bloodline, even not college graduate, (but educated technical skill in US military) even out of elite-line, but should be called line of ability and conscience with resistance spirit (grown in massive public foundation) against the establishment power.

(3) The deadly Government financial situation.

(a)**USA**(USA GDP=16.38T\$,Budget=3.803T\$).

USA government 2013 data: http://www.mofa.go.jp/mofaj/area/usa/keizai/eco_tusho/us_2013.html					
income=3.803T\$ income contents rate outpay=3.803T\$					
revenue=2.902T\$ 76.3% budget=3.803T\$					
debt=(3.803-2.902)=0.901T\$ 23.7% financial cost % ???					

Government total debt is \$16.77 trillion as of M/ 31/ 2013.

http://en.wikipedia.org/wiki/United States federal budget

Financial cost in government is payment sum of interest (R_{fg})\$223 billion in FY2012 (6 %).and principal(M_{fg}).=???

must see **AMERICA'S TOTAL DEBT=59T\$(+117\$T).**< GDP=16.38T\$,

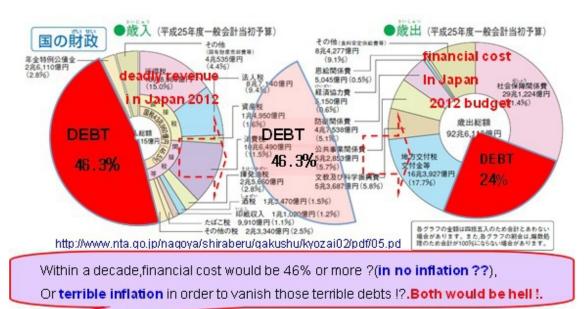

http://grandfather-economic-report.com/debt-summary-table.htm

Especially note that **USA** has been the **top debt nation** in the world !!.

(b) JAPAN (Japan public DEBT=1008T¥, GDP=520T¥, Budget=90T¥).

Following are data in **Japan** government 2012. They has been just in **debt hell** at now !!!.

 $\underline{\text{http://www.chuo-u.ac.jp/research/institutes/economic/publication/discussion/pdf/discussno205.pdf\#search='QE3\%2C\%E6\%B3\%A2\%E5\%8F\%8A\%B9\%E6\%9E\%9C'}$

Also Japan government is impossible to repay debt =1000T¥ while income=90T¥.

To tell as for USA,income(GDP) is 16T\$, while accumulated DEBT(public+private) is 59T\$ or more(+117\$T?). It is also almost impossible to repay !!!, Then what could happen?. Possible way is two. One is **default with liquidation**, the other is printing money by central bank to buy national bond toward inflation. The latter is entirely **life prolonging policy** which would be effective for a while. That is, entirely repaying debt by borrowing more debt toward financial collapse. However, someday shall come when **financial cost**(repayment for principal and interest) occupy almost of the government budget. **It's death of government function**. To tell the fact, government with massive debt had already been **bankrupted**. But none will admit the serious fact of default necessity. Wealthy creditors with massive bond has been worrying on default which has been suppression on poor government(**plutocracy regime**). Then who would be victim of the disaster? By anyhow, coming default would be inevitable. However it is told "a crisis is simultaneously chance". A decisive key concept in this report is "default with reasonable liquidation". Conclusionary to tell, a default could be salvation toward new regime construction. It is better to do haste.

(4)decadent commercialism.

Essentially **industrial capitalism** had ended, because recent goods are almost **decadent** one. So there are nothing to do. On the contrary, the **prolonging** is fatal to be **harmful**.

[2]: Default due to Carbon Energy Budget in more than 80% reduction policy. (1)Minimum Energy in the most fundamental sectors in securing life.

The trend of energy supplying and consumption (Japanese 2009)

http://www.enecho.meti.go.jp/topics/hakusho/2011energyhtml/2-1-2.html

Following discussion aims life by less than 20% carbon energy. It's a very coarse estimation on minimum life assurance. Conclusion is affirmative, that is possible by about 20%. However that would be very tight, so emergent **new energy developing** is decisively necessary.

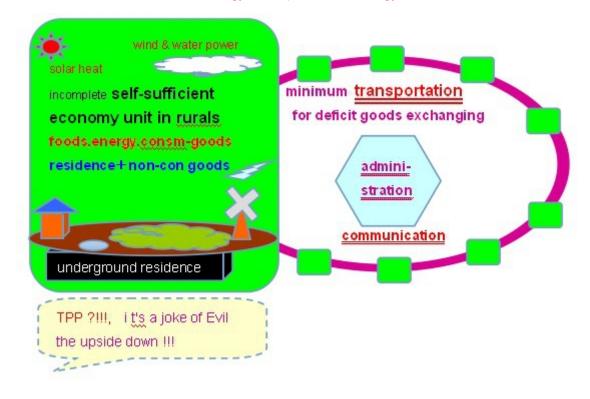

After all,most corporate in industry and service sectors would be forced **closure to bankruptcy** due to less carbon energy and massive people would lose job ,but become nation soldier to secure own life. They shall become assistants for agriculture and energy engineering. Another important task is constructing **underground residences toward coming long era of wild climate.**

Note energy ratio in the total of **14394x10**¹⁵J for **indispensable sectors** agriculture-fishery, rail road-communication,... and ,kitchen in **2009** Japan are following table.Note the values in table are current one, which must be drastically improved to reduce more.

Energy partition must be rationing by strong public control.

2009Japan	100%	14394x10 ¹⁵ J	the total value(%) \$\)\(\frac{\frac{1}{9.2\%}}{9.2\%}
Industry	42.8%	6160	agriculture-fishery=1.3%?
most are	XX		Energy Engineering is crucial for everyone!!!!!!
become		(10% →	geo-engineering project(Arctic methane,)
soldiers			Industry-consumer products
transport	23.6%	3397	rail road=0.5%(7.0x10 ¹⁵ J).
			*bicycle & horse carriage are recommended water fuel for small vehicle(Stanley Meyer)
			communication=about 0.15%.
service	19.5%	2807	residence heating & lighting=70%/2807PJ. XX
	XX		medicare+school=3.5%
home	14.8%	2130	kitchen=1.2%,room heating=3.7%
			*skylight and roof fun heater are recommended

^{*}rail road=0.5% ?,is it electrical energy or the primitive oil energy ??

(2)Ban on 80% carbon energy is to cause massive closure in industry and service.

This is **big crucial problem of planned economy** for synthesizing renewal economy regime. Then people jobless is to return their rural homes to establish self-sufficient life(\equiv SR(I)),or to become soldier(\equiv NP) under administration operations.

(a) Massive bankruptcy of corporates by ban for carbon energy.

Massive closure would become bankruptcy for corporates which should be considered war-victims for rescue in **liquidation**. Some indispensable portion of corporate would be employed in national projects. The bankruptcy must be well planed.

(b) Problem of Goverment Finance:

Government could not get sufficient revenue by business sector closure. Then possible method is Issuing new money with certain exchanging rate for old money(in domestic dealing). At the same time, government could not stop to declare default on national bond. The liquidation may be canceling by emergent property taxation in domestic, and by bonds (real assets) for abroad. Note the time is wartime regime !!!. If national economy system is zero sum theorem (ZST, no red and black) state (0=income—outgo for everyone), the total issuing money become income for government (taxation and national business sales income). If not, someone become debtors, while someone become creditors of national central bank, and debt-bond are canceled to zero (Appendix 3).

(c) Problem of Manpower (labor and technical) Support:

NP:(national project I)

They would work for national project accomplishing self-sufficient economy systems (I). Recovering farms devastated and constructing new farms for coming famine era. Another national project is carbonless energy engineering and global forestization (II). And Arctic cooling geo-engineering (III).

(d)Problem of Financial Support:

Maybe government finance would be very difficult, however, **high military budget** could be utilizable for national projects. Many **pension funds** would be corrupted in coming economy crisis, so they should **invest** those fund to buy **real asset of foods producting**.

Not money, but real foods saving could secure future life.

(e)Problem of Cultural Support:

An artist was job of beggar in ancient era. So jobless soldier should be disciplined In business technical training and also in art training. Music, opera and sport..., are best.

- (3) Most of Industry would be closure, but exceptional and emergent one Most of energy consumption sector at now is industry for luxury goods products, Those must be decisively closure to reduce massive carbon energy. Even though indispensable industry would be the most energy consumption factor. Note corporate could survive by spontaneous transforming to be less carbon energy along the tentative plan"(1)(c)" in ready time or in more time by respite.
- (4)Minimum Transportation with local self-sufficient economy.

 In order to establish minimum transportation, it is Recommendation on self-sufficient life in agricultural-rural areas. Recommendation on self-sufficient economy in rural villages and towns. Many people as they could go and live into rural area.

 Minimum transportation could be accomplished by "railroad" the highest energy efficiency(23.6→0.5%). Old style of street car recovering are recommended. bicycle & horse carriage are recommended in short distant transportation.

 water fuel would become notable for small vehicle(Stanley Meyer).

http://www.777true.net/Water-Electrolysis-by-Charge-Density-Wave-could-Create-Energy.pdf

- (5) Most of Service sector would be closure, but exceptional and emergent one Medicare, school, indispensable research and education institutions are important. Energy consumption in this sector are residence heating and lighting of 70%!!. Drastic high efficiency by tough effort would be indispensable.
- (6)Home consumption should be kitchen and heating for minimum life saving.

 roof water heater,skylight and roof fun heater are recommended. Above all,underground residence construction would be crucial in coming wild climate era.

*underground room could be digged up by one person for 4,or 5 month ?!.

[A] : Global Bankruptcy Declaration in Climate & Economy Crisis

(1) Climate Crisis Declaration by scientists on 80%CO2 cut & Arctic Methane Emergency.

This is possible, because climate conclusion on coming era are almost certain. Nothing carbon reduction is to cause more higher global temperature with devastating most of people's life by wild climate. It would be unprecedented hell world of famine and chaos. The last stage is mass extinction event of Arctic Methane Catastrophe in about 2040.

Possible global and emergent countermeasure(main national project) are as follows.

I More than 80% carbon energy reduction to sink surplus CO2 in atmosphere for more than 60 years. In about 30 years, global temperature rise could be stopped with $+0.3\sim0.4$ °C. II Now Arctic ice rid retreat has been in **positive feedback** by ice extent retreat with increasing solar ray input. In order to stop the retreat, Arctic Cooling Engineering is decisive. III Securing people's minimum life in above mentioned conditions.

(2) **Default Declaration also in Economy** by *leading nations*

USA,EU,Japan,and etc nations are substantially bankrupted government nations, And also they has been **the most accumulated emitter of CO2 debt.** Their unique possible way for salvation is **declaring default**(It is nothing,but declaring war defeat due to [1]) toward reasonable liquidation. It is nothing, but **resetting of the regime**.

(3) The Plan for Resetting to new Regime (ready time for 2,3 years)

- (1)The Purpose.
- (a)deadly climate fact confirming by government due to (1).

Notification on Strict Carbon Energy Rationing by the 80% reduction policy. Notification on Emergency of Arctic Cooling geo Engineering.

- (b) Government Default Declaration toward reasonable liquidation.
- (c)Foretelling Industry Bankruptcy and Massive Jobless by ban on carbon energy.
- (2) The Implementation.
- (d)Notification the tentative Plan toward new regime with energy rationing, with new money and with massive employment<Operation Global Ramadan>.
- (e)Notification on researcher employment on the final Planed Economy.
- (f)Starting industry resetting and registering new employment(soldier)due to the trial plan notified by government.

- (4) National Referendum Yes or No on 80%CO2 cut & Arctic Methane Emergency.

 National Referendum Yes or No on Default Declaration toward new regime.

 In the matter of course, nation people shall be explained the cause and new regime plan.
- (5)Yes=starting installation on operation Global Ramadan(2,3 years for R&D !!!) =Pseudo Wartime Declaration by Government to set up the OPERATIONs

[B]: Employment in (pseudo)WAR TIME REGIME. 2013-11-21

(1) Singular feature of massive mind paralyzing in facing climate crisis.

Climate crisis is nothing,but decisive fatal reality. However it is too inconvenient to admit, because honest admitting is to **denay the modern civilization-itself** of the gorgeous **capitalism regime** with **massive consuming of fuel energy**. However to say so, coming climate hell is more outrageous denying the civilization, because the final stage would be mass extinction events of all life on the earth<Arctic Methane Catastrophe at nearly about 2040 in current trend without decisive global countermeasure>. Then most hesitating people is just **climate scientists** who had known both the fatal reality and the too inconvenience against the modern civilization.

Then only possible countermeasure is **global war time regime** by **all people becoming soldier with GHQ** who has well programed operations against climate crisis. Their main tasks are (1)life **assurance of all people** with minimum energy of (2)**80%CO2 cutting** and (3) **Arctic Cooling Operation** intercepting Methane Catastrophe. It's outrageous and unprecedented operations which never be before. This is nothing, but **a final judgment**.

(2)In order to accomplish both aims of **Securing People's Life** and countermeasure against **Climate Crisis**, fundamentally they should be **soldier** and ordinal **businessman** in private sectors. Between public and private, **manpower trading(employment and lay-off)** with the cost is necessary due to those wants.

GHQ=Gen	GHQ=General Head Quarter(1)(2)(3)administration						
private	private public						
					mps	tax	
foods	foods energy goods goods research service soldier admini-						admini-
product consume tolerable educatin (jobless)						stration	
manpower supplying(mps)							

Actually becoming soldier is limit-less **unemployment assurance(minimum life income)** with responsibility(there is problem of rejection) of accepting order to join certain works

- (a) The system must be consistent in finance(that is "income payment").
- (b) The system must be effective and productive in purpose of the WAR TIME REGIME.
- (c)The system must be satisfactional both for soldiers and their employees.

[C]: Problem of Goverment Finance in new money regime:

Issuing new money is not fraud, but righteous deed so long as no breaking ZST!!.

At now also author himself had no **insight on new money issuing**. However **by zero sum theorem(ZST)**<**total monetary asset**=**total debt**, that is total monetary asset is substantially zero>,it could be comprehensible. Or imagine an elementary dealing where seller gets +M,while buyer lose -M,and their total money never increase or decrease by a dealing. Note a government can issues money +M by **own debt**=-**M**,which is the key !!!. **0**=+**M**-**M**.

For example,imagine that all people are public servant getting salary from nation.and they are to send to industry for labor power. A government can issues money +M by own debt=-M. A government feed +M to nation people as their labor value. People is to buy goods +M from industry to secure own life. Thus industry get sales +M. Simultaneously people is to work industry with labor cost +M. Therefore industry pay tax +M to government. Consequently, the issuing money +M is to return government < government becomes nothing again>

In the other hand ,corporate has another dealing of **domestic inter-corporate dealing** of sales +C, **export** sales of +E and buying from abroad -E'(**import**).

By ZST,
$$0 = +C+E-E'+X$$
. If $0 = +E-E'$, then $0 = +C+X$, $X = -C$.

Some corporate's sales = -C, which is red and the debt was to feed from **bank**.

[D]: The financial simulation.

Following is a possible primitive, but **consistent financial model** around government issuing new money(NM). It's also a problem of planed economy.

outgo	Household 50	Corporates B+100+B+A	government 100(NM)	Central Bank B	Abroad A
Household 50					1
Corporates 50+B+50 +B+A					
government	•	100	table-6	self-sufficien	t economy
Central Bank B	4			outgo	Household labor=outgo goods=income
abroad A	4			Household labor goods	

- (1)household income 50@ from government become pay corporate for people's life. It's salary for soldier who work corporate as public servants.
- (2)corporate income 50@ from government become national project expenditure.
- (3)Inter-corporate payment=B cost is supplied from bank(debt=B). Which becomes sales income of another corporate(debt repayment or asset=B into bank).
- (4)Corporate get export income=A with import cost=A.(zero sum state=ZST).
- (5)Corporate is to pay tax 100@ at end of year, which cancel s debt of government. 50@ is salary component, while 50@ is substantial corporate tax.

This is due to taxation principle for those who gain sales in public infrastructures.

- (6)Bank initially pay B corporate debt, while corporate repay B at end of year. By debt, any corporate could do future investment for coming needs.
- (7)Some corporate made debt=B,while some corporate got asset same amount due to ZST. Corporate debt could be canceled by selling their stock or asset.

[E]: The details of inter-corporate dealings with bank.

	Corporates(black)	Corporates(red)	Central Bank	
	$C_{bb} + C_{rb} + B_b$	$C_{br} + C_{rr} + B_r (=0)$	$B(=B_b)$.	
Corporates(black) $C_{bb} + C_{br}$				
Corporates(red) B+C _{rb} +C _{rr}	•			
Central Bank B	+			

- (1)In table 6,there is hidden,but main dealing between corporates, which is sales = $C(=C_{bb}+C_{br}+C_{br}+C_{rr})$ due to own capital.
- (2)Corporates(black).

$$C_{bb} + C_{br} = C_{bb} + C_{rb} + B_{b}$$
.

 $C_{br}-C_{rb}=B_{b}$[black sales from red]-[red sales from black]= B_{b} deposit of black

(3)Corporates(red).

$$B+C_{rb}+C_{rr}=C_{br}+C_{rr}+B_{br}=C_{br}-C_{rb}+C_{rb}+C_{rr}=C_{br}+C_{rr}$$

$$B+C_{rb}=C_{br}+B_{r.}$$

$$B-B_r=C_{br}-C_{rb}=B_b\langle \frac{debt}{}\rangle$$

$$(4)B = B_r + B_b.$$

(5)red corporate can not repay debt=B,while black one make deposit=B in **a term**.

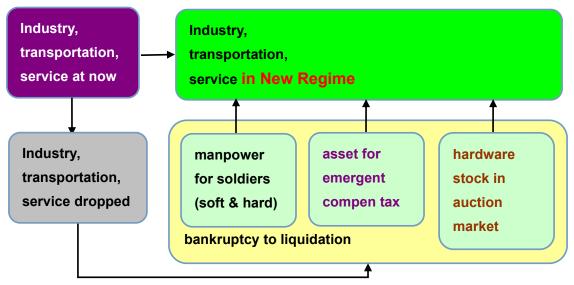

$$B_r = 0$$
, $B = B_b$.

- (6) Some corporate become red, while the others become black in a term.
- . Someday might come for debt repayment, or not.
- (7)If $\mathbf{B_r} = \mathbf{B_b}$ could be created by **no tax payment in red corporate**,the debt for bank is vanished to repay $\mathbf{B_r} = \mathbf{B_b}$ to bank. Then government becomes red by $-\mathbf{B_b}$ (own debt not canceled). This may be reasonable.
- (8)Even as though,if government and bank were co-body,they could manage cash **B**_b by transfer the deposit component of black corporate.to government.However the government debt for bank still has been.

[F]: Starting industry resetting and registering new employment(soldier) due to the tentative plan notified by government in ready time interval(2,3 years).

This is pseudo wartime, at when, necessary settlement(liquidation in closure industry) in the priority order must be logically and decisively done. Even as though, people's minimum life assurance must be secured by anyhow. Those who would loss in liquidation must decisively recognize that excess carbon consuming is supreme sin to cause mass extinction of life on earth!!!.

- (1)It's a work on **evaluation and estimation on taking and dropping** section in corporate due to **the tentative plan**. Even though dropping sections, those are to be utilized in future. **Those are not scraps, but treasure.** Win or defeat is to depend on this crucial task !!!.
- (2) Taking section must, or will very possibly be along with the plan.
- (3) The rest portion is to be **liquidation(hardware)** and **manpower lay off(hard&software)**. Both are valuable so those should be registered to **auction market** for coming buyers. Also nation is buyer.
- (4) **Laborer with jobless possibility** shall **register** to public labor office to become soldier.
- (5) **Dropping Corporate** with debt are to be sold to creditors for liquidation.
- (6) Dropping Corporate with asset are to be emergent property tax targets for government It's could be considered as **compensation** for causing deadly crisis.

It is best scenario of spontaneous transform from dropping to taking in corporate.

For the aim of operation(1)(2)(3), anything in dropping portion shall be utilized. This is a war where anything could be utilized to entirely win.

(7)Industry category and role of their position in the plan.

(a) The beginning may be very bitter < from disposable toward repairable > .

From view of **extravagant now era**, extreme goods deficit will attack to all of you by less carbon energy industry(**42.8**%→**10**%). The possible way in life may be throughly conserving non-consumable goods by **repairing**. Consumable goods such as paper,ink,drugs,soap ,etc become minimum supply. Clothes are tolerable for decades,but except are working, under wears,and shoes etc. Most of goods should not be scraps,but reserved for **repair parts**.

(b) It is biter life-itself that could drive desirable evolution.

Then urging on **new energy development** would be loud by all sectors. As for the technology possibility, author has been optimism at all. It is the demand that will push abrupt development and **global popularization**. A necessary is mother of inventions. This revolution would widely grow various kind of inventions in every area, which had been suppressed in carbon energy decadent era. Invention is very crucial not only in various level of parts, devices, but also in various level of system design the crucial.

(c) Geo-engineering on Arctic Cooling and Global Forestation.

As for this crucial tasks, industry regime must be arranged to the emergent implementations,

[H]: As for coming the ready time(2,3)years.

The tentative plan would be crucial for coming the preparatory time years.

Because only in this interval, everyone has no carbon energy limitation. Or in this time, everyone must do transform toward possible preparatory for **coming carbon ban era** (**C-ban era**). Then what we can do toward **more than 80% reduction** ??!!.

- (2)Only carbon less corporate or high priority one would be survived in C-ban era. However also high priority sectors must take strong strategy of new energy technology.
- (3) Estimating indispensable goods volume by minimum energy is crucial in C-ban era.

This is the most crucial rationing problem in "planed economy" by experts.

	foods,	goods set_1	goods set_2	goods set_m'	goods set_m
energy	E 0 < EM	E ₁	E ₂		<i>E</i> _m <i>≦E</i> _M ??
energy"	E ₀	E ₁	E ₂	E _m '≤E _M !!	

As number of goods increases, the energy also increases. Thus from energy limitation= E_M necessary goods kind and volume shall be roughly estimated<demand side economy>. (4)Supply side economy calculation to determine real energy= E_m .

Due to (3), necessary industry with market size and with energy E_m ' shall be determined. If more accurate E_m ' $\leq E_M$, OK!.If not so,number of goods must be reduced to re-calculate.

* arrows are money flows with goods reverse flows.

Thus even a goods in general needs many components with many corporates net work dealings. In C-ban era, design on goods needs minimum components without redundancy.

(5) Due to above calculations, necessary industry with the market size, the cost , or corporate liquidation size and lay off size would be determined.
