

We consulted AI(BING) on the dimensional compressed current Japan -world problem and the action strategy. 2023/4/18

Will BING be actually helpful? ? ! , chatGPT? , Humans are too stupid to face deadly extinction risk,so necessary toward united action by teach of authoritative AI developed by all-out global human endeavoring! !

* An AI essential function is Information dimension compression <lies are contradictory and diverse and not be compressed.if not ,the AI is fail.>

≡ Single truth aggregation = United Action! ! ”

* Another AI essential function is Information synthesis by our request.

* Mr. E Mask and others' concerns are misplaced, change your mindset and take united action toward this direction within half a year! ! !

Q1:Please summarize the problems facing Japan today → BING

“The current world is easily destroyed” The reason ,researcher reveal too scary

Countermeasures → In addition to decarbonization, atmospheric CO2 removal technology is also necessary

<https://news.yahoo.co.jp/byline/shivareii/20180422-00084305>

The cause: Arctic sea ice is like a giant mirror that reflects the sun's rays, but as the ice melts, it causes the Earth to store more heat. If this happens, the permafrost of Siberia and the methane hydrate (ice-like methane gas) in the sea will melt, releasing large amounts of methane gas, a greenhouse gas more than 20 times stronger than CO2, further accelerating global warming will become.

10: *National and global failure to understand and act prevently on these risks*

“We can turn this dangerous situation around if we unite around the planet to do so.

“If we bury our differences, pool our skills and brains and act as responsible citizens of the Earth – not people divided by national differences.”

Appendix 1: Concerns of E-Mask et al.

<https://news.yahoo.co.jp/articles/dc6228a3496a6b40fae400e36bf74fb1f095a5ac>

The letter details the risks that AI systems competing with humans can pose to society and civilization in the form of economic and political disruption, and urges developers to cooperate with governance authorities and regulators. urged

When humans and AI compete, humans lose <AI eventually wins in past chess>, low cost and low energy is the first principle in economy- environment , human labor burden and environment damage factors are reduced, on the other hand, machines contribute to tax revenue, Therefore, the rest is a political settlement on re-distributional income and working time. Agricultural labor transfer by automatic work by increased AI brain work, It is a priority request in this era.
